Subject: **REACH Compliance of Performance Films Products**

The film products produced by Solutia's Performance Films division are classified under REACH as Articles. As such they are governed by the REACH "Guidance on Requirements for Substances in Articles" (published May 2008).

18 June 2010, the European Chemicals Agency has added 8 chemical substances to the Candidate List of Substances of Very High Concern (SVHC) for authorisation. The current Candidate List substances are identified below. Based on our knowledge of the raw materials and the process, Performance Films products do not contain SVHC's listed on the ECHA candidate list at or above the 0.1% concentration limit. As more substances are added to the candidate list, Solutia will update this information.

Based on our knowledge of the raw materials and the process, Performance Films products are in compliance with Annex XVII of REACH. As the Annex is updated, Solutia will update this information.

Solutia is well aware of the European REACH regulation. We are committed to meeting our legal obligations under REACH as a manufacturer and/or importer and are preparing for it. However, we cannot accept any other obligations or liabilities, unless such liability follows from an existing contractual relationship. Nothing in this letter shall therefore be construed or interpreted as an acceptance of liability by Solutia or Performance Films.

If you have further questions about this or any Solutia product, please do not hesitate to contact me.
